SWISS BASED GLOBAL RELEVANCE

Headquarters in Zurich
Customers and partners on 3 continents

130 employees
including development partner Ventum

More than 180 installations world-wide

More than 50 implementation partners

BELIEVE THE ANALYSTS

BARC – The Data Management Survey 2024

Datavault Builder is clearly laid out, graphically fantastic and helps with the visualization of data streams.*

CIO/IT management, Real Estate Consulting, <100 employees

Overall, I think Datavault Builder is a great tool that streamlines the implementation of data warehouses. You can build a fully-fledged data vault in a matter of minutes.

Enterprise architect, Space Agency, >2,500 employees

Model-driven. Graphical support for the logical target model for the Datavault. Ready-made loading patterns without having to make manual adjustments.*

CEO/board member, <100 employees

Very innovative suite, high productivity for building, deploying and running cloud data warehouses.

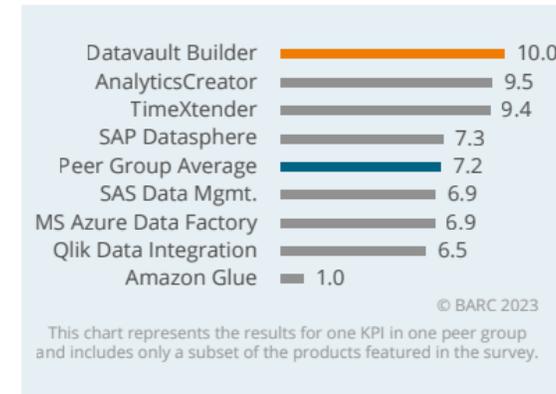

Enterprise architect, Consulting, >2,500 employees

Project Success – Top-ranked

Peer group: Data Warehouse Automation

KPI Results

6 top rankings
and
22 leading positions

Datavault Builder performed significantly above average in all KPIs in the *Data Warehouse Automation* peer group except for the *Competitiveness* and *Considered for Purchase* KPIs, both of which point to a lack of visibility in the market. The tool excels in nearly all the functional and technical metrics and all the users surveyed are satisfied with both the software and the vendor. 100 percent of users rated *Vendor Support* as “excellent” or “good”, leading in turn to a high Net Promoter Score of 57. Overall, Datavault Builder achieved 6 top positions and 22 leading positions, while 41 percent of users reported experiencing ‘no significant problems’ with the software, which is comfortably above the average of 28 percent.

Aus welchen Quelltabellen kommen die Daten?

„Nicht die letzten Plan-Daten“

WAS WÄRE WENN....

„Das Werkzeug für unsere Data Management-Prozesse ist für mich sehr **übersichtlich**.

Ich habe mir sogar zugetraut, Formeln wie die Berechnung des Rohertrags **zu ändern**.

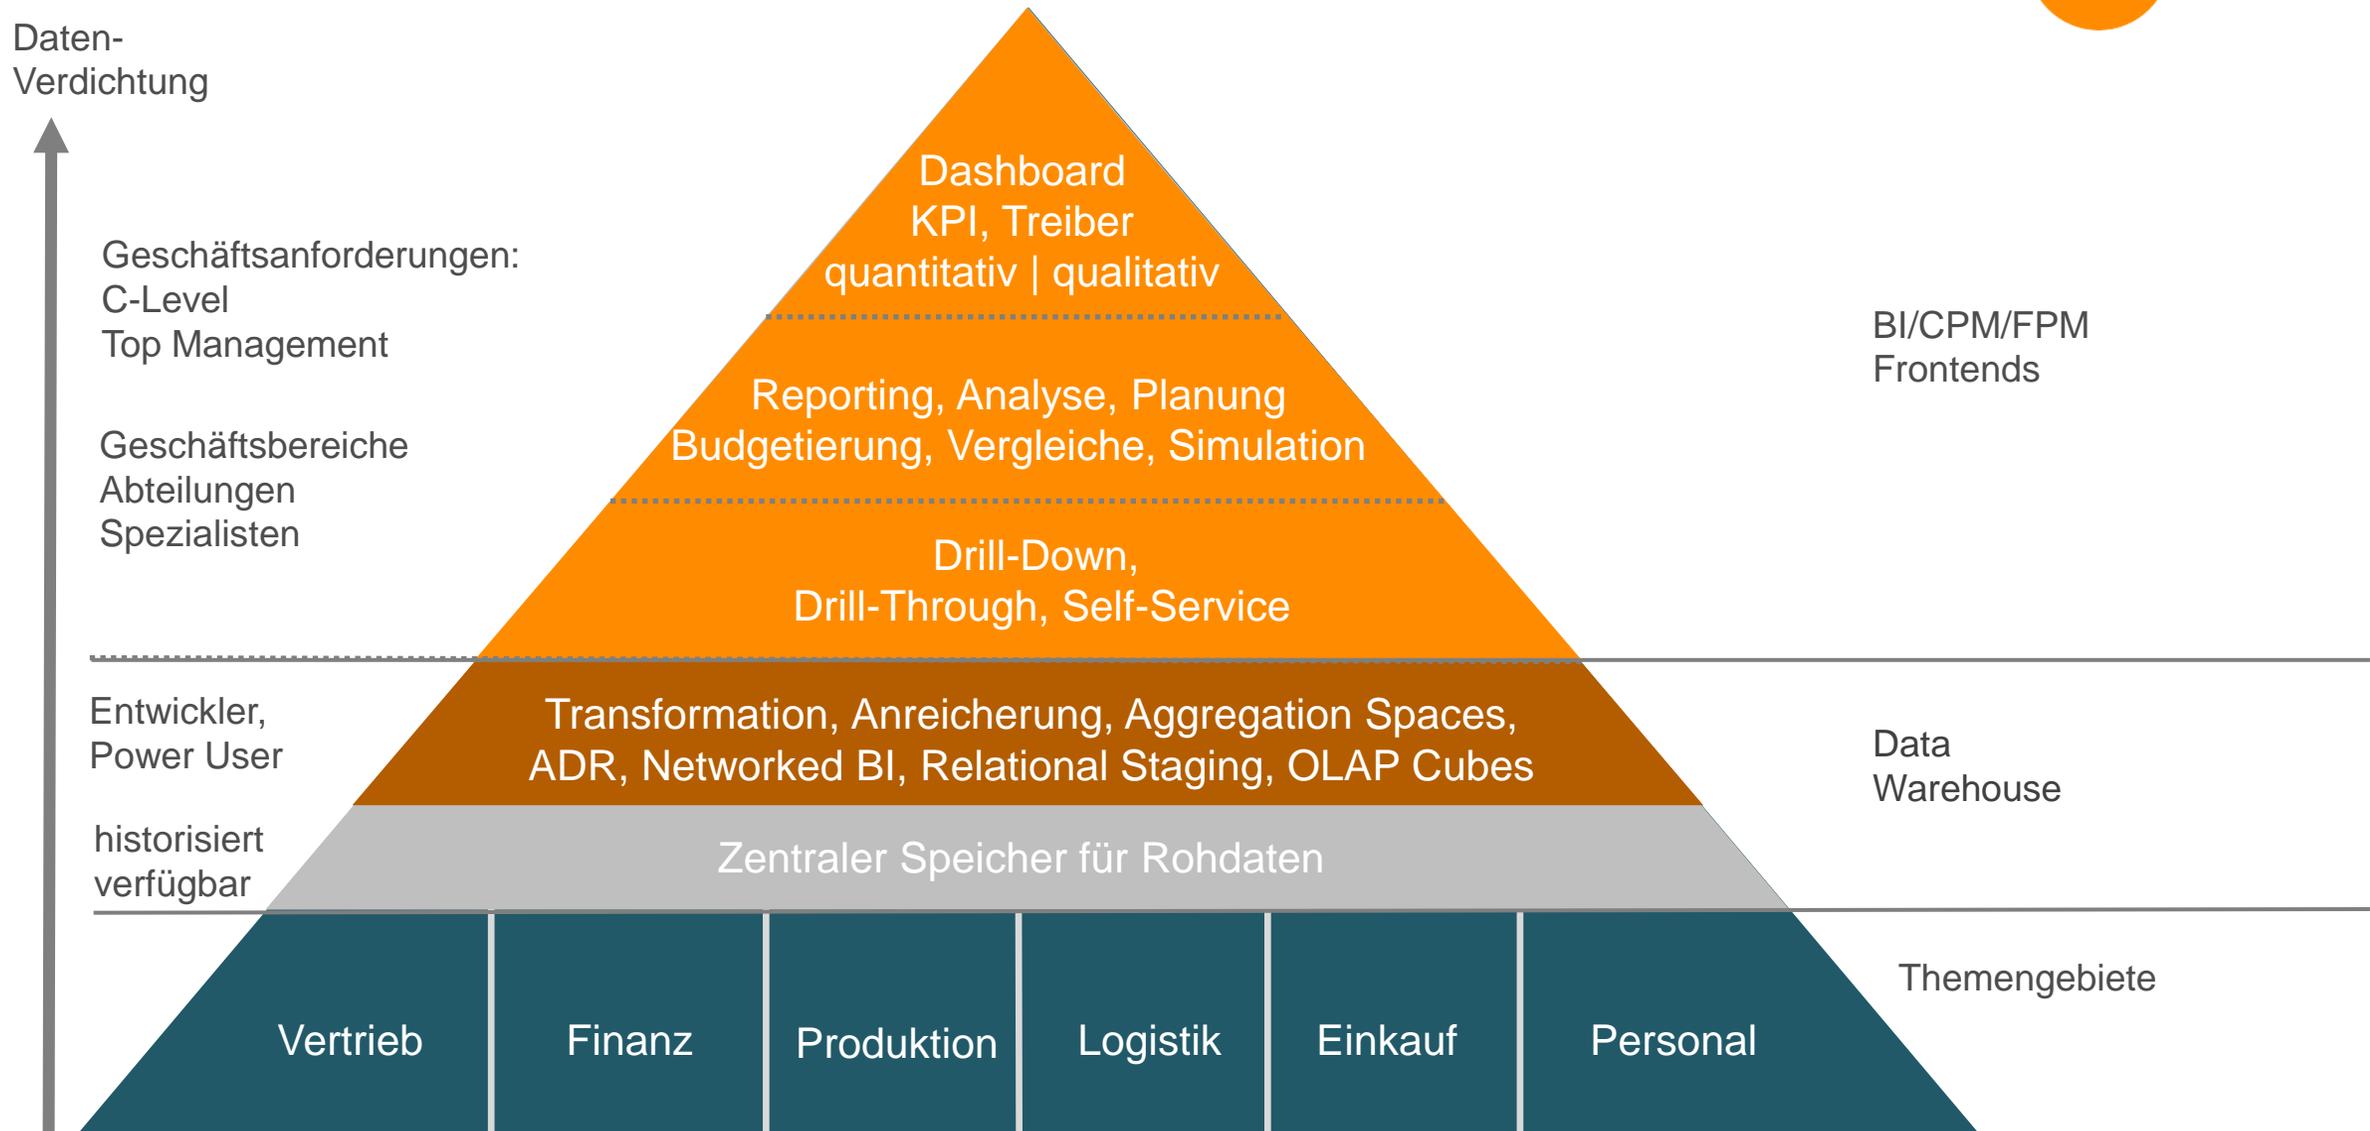

Besonders hilfreich ist, dass es **leicht zu erkennen** ist, welche Daten und Tabellen miteinander **verknüpft sind**.

Ich sehe sofort, welches Feld aus dem Vorsystem (ERP) genutzt wird, da der originale Feldname im DVB angezeigt wird.

Obwohl ich nicht tiefer eingestiegen bin, hätte ich mir das auch **ohne IT-Kenntnisse** zugetraut.“

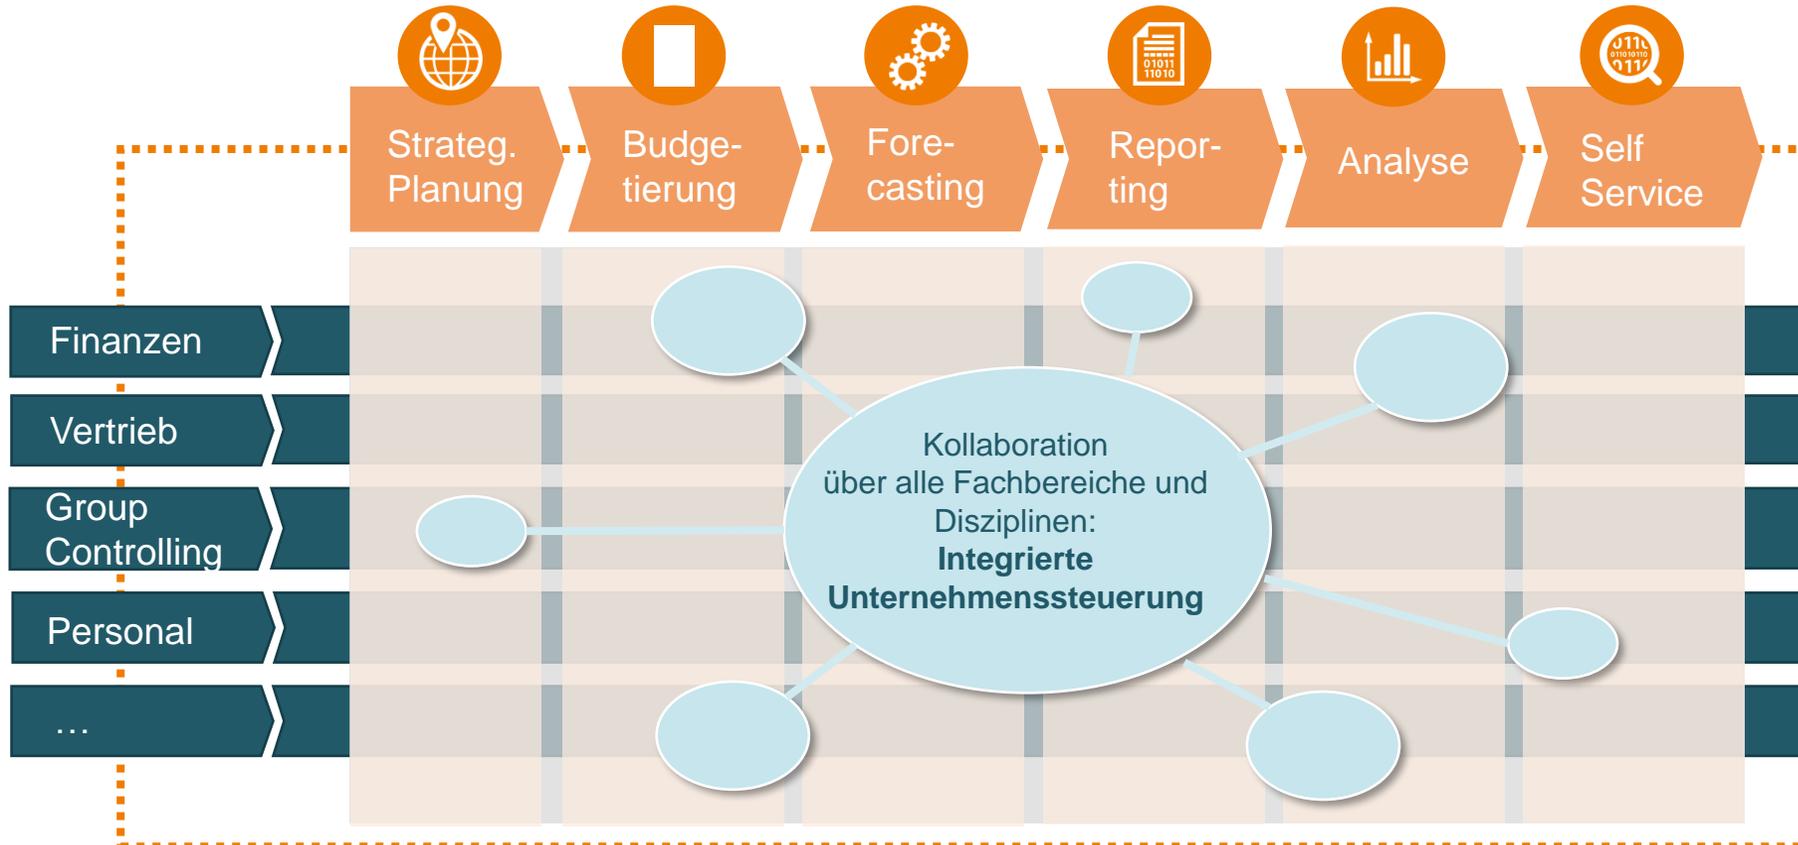

**Stefanie G., Controlling

The diagram shows a central 'Flight' entity (blue square) connected to several other entities: 'Ground Handler', 'Caterer', 'Origin Airport', 'Destination Airport', 'Passenger', 'Airline', and 'Airplane'. 'Flight' is also connected to 'Airline Alliance' and 'Passenger'. The entities are grouped into colored regions: 'Ground Handler' and 'Caterer' are in a green region; 'Origin Airport' and 'Destination Airport' are in a red region; 'Passenger' is in a purple region; 'Airplane' and 'Airline' are in an orange region; and 'Airline Alliance' is in a light blue region. Relationships are indicated by arrows: 'At Origin' from Flight to Ground Handler; 'At Destination' from Flight to Caterer; 'Operated' from Flight to Airplane; 'Served by' from Flight to Airline; 'Origin' from Flight to Origin Airport; 'Destination' from Flight to Destination Airport; 'Passenger' from Flight to Passenger; and 'Alliance' from Flight to Airline Alliance.

FAZIT VON STEFANIE G. NACH DER EINFÜHRUNG VON DATAVAULT BUILDER

- Einstiegshürde für Controlling gering
- Größere Unabhängigkeit des Controllings von IT
- Fachbereichsfreundliche Unterstützung verschiedene Datenquellen anzubinden
 - godesys ERP
 - Navision
 - BC (in verschiedenen Versionen)
 - ...
- Intuitive Bedienung für Fachbereich
- Interne IT konnte Kapazitäten einsparen und musste nur Serverbereitstellung sowie Zugänge ermöglichen
- Ziel erreicht: Verschiedene Datenquellen konnten angebunden werden und waren zusammen auswertbar

UNSER ANGEBOT FÜR SIE:

Sie investieren Ihre Zeit, wir unser Wissen!

Ihr Exklusiver Strategie-Workshop - Digitalisierung Ihres Controllings -

Ihre Vorteile auf einen Blick:

- Diskutieren Sie mit unseren erfahrenen Berater:innen Ihre aktuellen Herausforderungen sowie fachlichen und technischen Anforderungen
- Beleuchten Sie gemeinsam Ihre aktuelle Controlling-Architektur
- Erhalten Sie eine Einschätzung, wo Optimierungspotenziale liegen und wie Ihre Ideal-Architektur aussehen kann
- Vorteile. Grenzen. Kosten/Nutzen.

Durchführung:

- Dauer: 0,5-1 Tag
- Mit Teilnehmer:innen des Controllings & Finanzen sowie IT
- Optional: Geschäftsführung und weitere Fachbereiche

Sie haben Interesse?
Sprechen Sie uns gerne
direkt an und besuchen
Sie uns an Stand H11!

VIELEN DANK FÜR IHRE AUFMERKSAMKEIT
